

# RESIN MOULDINGS

## WEDDINGS

Create a romantic setting for any ceremony or event. Transform a stark banquet room into an elegant showplace and provide an attractive background for photographs. Use the essential wedding products for intimate, family affairs and expand the range of decor to accommodate the most extravagant wedding or event.

## CORPORATE

Add Mediterranean flair and ambiance to sales meetings, awards dinners, black-tie affairs, executive retreats, training seminars and other corporate events with a host of versatile event décor products. The elegant yet lightweight columns, pedestals, colonnade systems, balustrades, urns and other products add visual appeal to stark meeting and reception rooms yet are lightweight for instant setup and breakdown by one person.

# TIPS AND IDEAS

## Cleaning

Most general, non-abrasive household cleaners will be suitable. Avoid cleaners that have dyes in them. If in doubt, always test a small area under the piece to be certain. Some general detergent mixed with water is best.

## Brightness

The best way to maintain the whiteness of the product is to place the item in direct sunlight for a few hours every 6 -9 months. Applicable to white mouldings only.

## Painting

The product can be painted, however paint can easily chip and crack. If you do decide to paint them, an undercoat of auto primer that's suitable for plastics will enhance longevity of the top coat.

## Assembly

Some columns have a nut moulded into the resin to connect the bases and arches. When connecting pieces that have to be bolted together, always tighten by hand only, to avoid stripping the thread or pulling the nut out of the resin moulding.

## Choosing the Right Chair

Complete the perfect picture with the ultimate wedding chair - **The Gladiator™**, by Nufurn.
